Top Skills

Apache Kafka
Elastic Stack (ELK)
High-Level Design

Certifications

Machine Learning using Python
Artificial Intelligence
Command Line Interface (CLI) With
Golang From Infosys
End to End Machine Learning with
TensorFlow on GCP
Storm Path Internal Hackathon

Harshit Singhal

Software Development Engineer | Building Scalable & Resilient
Systems | Bajaj Finserv Health | Ex-ADP
Pune, Maharashtra, India

Summary

As a lifelong problem-solver, I've always been drawn to the power of technology to create elegant solutions. My journey as a Software Development Engineer has taken me from developing mobile apps with React Native to architecting complex, enterprise-scale systems for industry leaders. Currently, I'm applying my skills as a Software Engineer at Bajaj Finserv Health, where I'm excited to tackle challenges in the dynamic health-tech landscape.

With a strong foundation in Java, Spring Boot, and cloud platforms like AWS and GCP, I thrive on building scalable and efficient applications. I have a deep understanding of the full product design lifecycle and a passion for agile development. In my previous role, I had the opportunity to lead a small team and mentor junior developers, experiences that I found incredibly rewarding. Whether I'm optimizing an API to cut response times by 40% or designing a new system from the ground up, my goal is always to deliver value and drive innovation.

Experience

Bajaj Finserv Health
Software Development Engineer
August 2025 - Present (6 months)
Pune, Maharashtra, India

- Contributing to the central Integration Layer, which is key to deliver a unified digital healthcare experience. I focus on developing the infrastructure that enables seamless interoperability between different health services, insurance products, and patient-facing applications, ultimately creating a connected and accessible health network for our users.

ADP

3 years 3 months

Sr. Member Technical

September 2024 - August 2025 (1 year)

India

- Driving development of an enterprise-scale document processing system using Java, Python and LLM's, achieving 95% accuracy in automated data extraction from diverse unstructured pdf documents.
- Engineered a scalable architecture that integrates Google Cloud Document AI, MongoDB, and custom PDF processing libraries, reducing manual document processing time and effort by more than 90%. Implemented Human-in-the-Loop validation workflow for low-confidence predictions, improving overall accuracy from 95% to 100%.

Member Technical

June 2022 - September 2024 (2 years 4 months)

Hyderabad, Telangana, India

- Architected and implemented an automated enrollment termination system processing hundreds of monthly transactions, mitigating manual processing effort in age-based terminations.
- Led a team in Critical Illness Plan enhancement project, delivering new features with 80% test coverage.
- Engineered multiple eligibility group support within single plans, reducing plan maintenance overhead and simplifying practitioner journey for plan creation.
- Optimized RESTful APIs through lazy loading and chunk processing, reducing response time by 40% and implemented server side rendering of AG grids to improve client performance.

TechVariable

Programmer Analyst Trainee

January 2022 - June 2022 (6 months)

Guwahati, Assam, India

- Developed Quii mobile app using React Native and scalable backend infrastructure using NodeJS and Firebase.
- Created a CLI automation tool reducing development setup time by 10% across all React/React Native projects.

Indian Oil Corp Limited

Project Intern - Indian Oil Corporation Limited (IOCL),

July 2021 - August 2021 (2 months)

Guwahati, Assam, India

- Designed and Implemented a Visitor Management System using Angular, PHP, and MySQL.
- Automated the process of logging the attendance of employees and visitors.

Anna University

Project Intern - The COVID-19 National Bioinformatics

May 2020 - July 2020 (3 months)

India

Lead a full-stack web and android application project with testing and automation and cloud deployment. Develop 13 modules for 36 states and UTs while handling large amount of data.

Education

Kaziranga University

Bachelor of Technology - BTech, Computer Science · (2018 - 2022)

Maharishi Vidya Mandir Senior Secondary School

High Secondary, C.B.S.E · (2016 - 2018)

Maharishi Vidya Mandir Senior Secondary School

Matriculation, C.B.S.E · (2016)
